

**IN THE SPECIFICATION**

**Please amend the paragraph on page 6, lines 7-16 as follows:**

Fig. 5 shows constituents of the display controller 24 shown in Fig. 24\_4, and this particularly shows one example of a detailed block structure of the frequency switching circuit 29. As shown in the drawing, the present invention is realized by disposing the circuits that selectively supply a clock frequency for controlling the switching of the DC/DC converter in the controller, in the conventional structure of the LCD display unit consisting of a liquid crystal panel, drivers, and a controller.

**IN THE DRAWINGS**

Applicants enclose Replacement Sheets for Figs. 1-3 adding the caption "Prior Art" thereto.
